

## DL Data Consent™

Privacy & Personal Data Management Platform

# Unlocking the Power of Blockchain for Consent Management

DL Data Consent™ is an enterprise solution that enables the management of collection and the use of consents in real-time. It ensures that organizations provide the highest standard of protection of personally identifiable information (PII) and allow their customers to completely control the parameters that define the usage of that information.

DL Data Consent™ seamlessly navigates regulations such as GDPR and PIPEDA. It uses Distributed Ledger Technology to offer organizations the security of keeping a transparent record of metadata and the ability to audit this information internally and externally.

## Why your Organization Needs DL Data Consent™

### Compliance

Hassle-free compliance with existing and upcoming regulations such as GDPR

### Consent Control

Give the control of Information back to the natural data owner

### Immutability

A permanent log of each interaction recorded on the Blockchain

### Transparency

Build trust with customers and stakeholders and enhance brand value

### Minimize Disputes

Minimize conflict with real-time information and transaction verification

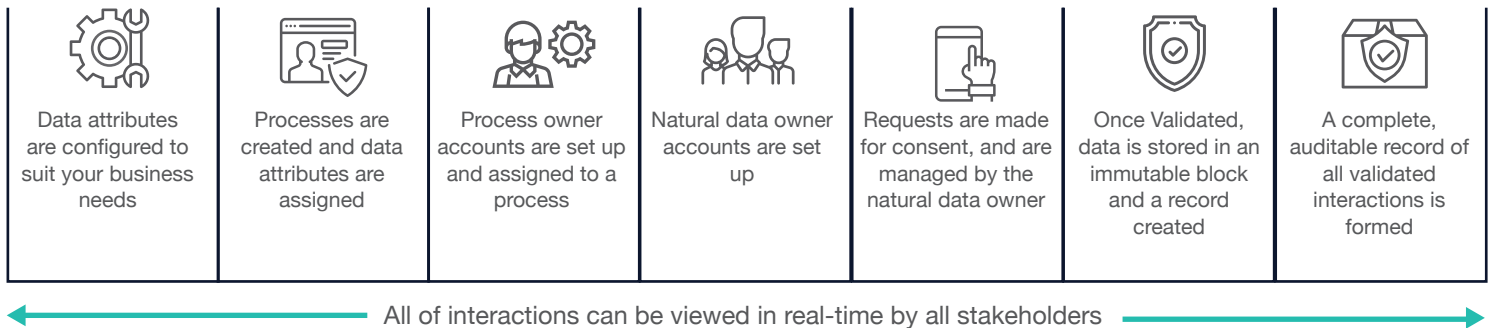

### PII Data Control

Keep PII data stored within the Enterprise and never on the Blockchain platform

# Features & Capabilities

<p><b>Modular</b> Seamless Integration into your infrastructure through REST APIs</p>	<p><b>Compliance</b> Record legal/privacy notices as accepted by natural data owner</p>	<p><b>Granular Permissions</b> Record consent based on multiple user preferences</p>
<p><b>Real-Time Information</b> Live logging &amp; management of consent</p>	<p><b>Dispute Resolution</b> Raise disputes and seek resolution through the platform</p>	<p><b>Dashboard</b> Reporting &amp; analytics provide data driven insights</p>
<p><b>Commentary</b> Real-time comments from all participants on the platform</p>	<p><b>Data Imports</b> Webhook &amp; G-suite integrations enable data imports</p>	<p><b>Easy Access</b> Web &amp; mobile application to manage consents</p>

# How it Works

## About **DLT** LABS

DLT Labs is a global leader in distributed data management, delivering Blockchain products and solutions for businesses while working in partnership with clients and distribution channels. With deep expertise in technical innovation and one of the world's largest pools of highly skilled and experienced Blockchain experts across the globe, DLT Labs' products enable transformation and innovation of complex processes.
